Red Jacket Water Products

Jets, Subs and Tanks

Our complete line of Jet Pumps and . . .

Water System Tanks . . .

Are designed to keep your business running and your customers happy. Our cast iron Jet Pumps are available in convertible and shallow well models. They are available with ½ to 1½ HP motors and can handle flows up to 26 GPM.

The CentriPro® water system tanks range from 2 to 116 gallon capacity. With 18 models available, we have a tank for every application. Constructed of heavy-duty steel, with an impact resistant coating, our tanks provide years of trouble-free service. Each tank has a FDA approved butyl diaphragm and a polypropylene liner that provides maximum corrosion protection.

A Variety of Submersible Pumps . . .

Enduro **STAINLESS STEEL** 

Balanced Flow

With built-in toughness and reliability for years of trouble free water supply. Our submersible well pumps range from our standard 4" pump with flows up to 32 GPM, to 5-10" submersible turbines with flows to 2000 GPM.

Our Balanced Flow Variable Speed Pump Controllers provide your customers with a compact, constant pressure water system and your business with profitable, easy to install products.

Whether it is for homes, farms, cottages, factories or municipalities, we build 120 years of experience into every pump and tank we make. For more information, contact your Red Jacket representative.

Red Jacket, we keep the water running.

Red Jacket: A History of High Quality Performance

Pumps that wear the Red Jacket name have a reputation for excellence and engineered simplicity. It's been that way since Michigan inventor Robert Lafferty developed the first Red Jacket product more than 125 years ago – a double-action iron pump that used both the downward and upward thrusts of the handle to deliver water faster.

The spark of innovation that marked Red Jacket's beginnings has burned brightly throughout the company's history.

The Grizzly submersible and the Enduro stainless steel submersible pump further cement their leadership in the water systems market.

Today, the Red Jacket Water Products brand is part of the family of pump products from ITT Corporation, the world's leading pump manufacturer. From its headquarters and factory in Auburn, New York, Red Jacket Water Products continues to manufacture and sell a full range of pumps that serve the water systems market. Its submersible, jet and centrifugal water pumps can be found in homes, farms, industries and municipalities around the world.

Now as part of ITT Corporation, Red Jacket can utilize the corporation's experience, expertise and resources and build upon past success by introducing new and innovative products into new and existing professional markets.

Customers know the Red Jacket name stands for the highest quality standards in the industry. Today, as it has been for more than a century, the Red Jacket logo is a symbol of proven performance, reliability and innovation.

Red Jacket Water Products reserves the right to make design improvements and pricing modifications as necessary and without notice.
